STAND-UP OPEN MRI CENTERS OF LOUISIANA

Patients are usually scanned in a comfortable seated position watching a 42" flat screen television throughout the procedure. Our table limit is 500 pounds and is ideal for patients that have shortness of breath, cannot lie down or are claustrophobic. Conventional lie down MRIs can miss information that is only visible when patients are scanned in an upright position.

Our ACR accredited facility offers physicians the choice to scan the patient in their position of pain. Both our technologist and radiologist have over 50 combined years of MRI expertise. We offer same day scheduling, 24 hour reports and transportation in the metro area.

Appointments
Starting at 7am

Watch TV during procedure.

MRIs in flexion and extension positions offer the most accurate diagnosis of herniated disc.
